Profile

Hello, I'm Janarthanan M, a Full Stack Developer who loves crafting end-to-end web applications. I'm well-versed in frontend as well as backend development, designing seamless and responsive user interfaces while implementing solid and scalable server-side logic. I possess hands-on experience in technologies such as HTML, CSS, JavaScript, React.js, Node.js, MongoDB, and Firebase. From developing clean UI to creating RESTful APIs or handling databases, I love accepting challenges and transforming ideas into practical solutions.

Education

2022 – 2026	B.E. Computer Science and Engineerig
Erode, India	<i>Anna University</i>
	CGPA:8.14%
2021 – 2022	12th Grade - Government Higher Secondary School, valapandal,percentage:79%
Ranipet, India	
2019 – 05/2020	10th Grade – Government High School, Mamandur ,Percentage: 81.2%
Arani, India	

Professional Experience

Backend Developer (Remote)
GU Datalogics | [january, 2025] – Current
Developed remotely using Node.js and MongoDB.
Designing and maintaining RESTful APIs and server-side logic integration.
Web Development Intern
Nanlogics | [December, 2024]
Completed 1-month internship with full stack web development emphasis.
Got hands-on experience in frontend and backend technologies.

Skills

Technical Skills

Programming Languages (C , Python, java,javascript.)
Frameworks (React.js)
Databases (SQL, MongoDB)
Tools (Git, Postman, VS Code)

Soft Skills

- Communication
- Time Management
- Teamwork
- Problem-Solving
- Adaptability

Certificates

- 📄 Participated in a Paper Presentation at Bannari Amman Institute of Technology (BIT)
- 📊 Took part in a Data Visualization Contest and received certification
- 🎓 Web Development Course – IBM SkillsBuild
- 🏆 Participated in an Intracollege Hackathon at VCET (2024)

Projects

01/2025 – 03/2025	E-commerce <i>Backend</i> E-commerce Web Project with Delivery Boy Integration <i>Technologies: [List technologies used, e.g., Node.js, Express, MongoDB.]</i> Developed an eCommerce platform with integrated delivery boy management for real-time tracking and order fulfillment. Integrated secure login and registration functionality for both customers and delivery personnel. Implemented RESTful APIs to handle order processing, delivery updates, and notifications. Used Postman for testing and API validation to ensure smooth communication between front-end and back-end systems. Leveraged Cloud services for scalability, secure storage, and performance optimization.
11/2024 – 12/2024	Portfolio <i>INNOV8TECH</i> <i>Technologies: HTML, CSS, SaasCSS, JavaScript</i> Developed a personal project portfolio to showcase technical skills, projects, and achievements. Utilized SassCSS for advanced styling and animations, enhancing user experience. Built a responsive, interactive frontend with HTML, CSS, and JavaScript to create a modern and clean design.
08/2024 – 10/2024	Dynamic DNS <i>DDNS</i> <i>Technologies: HTML, CSS, JavaScript, Cloudflare API</i> Created a Dynamic DNS service to automatically update DNS records when the public IP address is changed. Implemented Cloudflare's API to control DNS records and provide consistent domain resolution. Created an easy-to-use frontend for domain and API credential management through HTML, CSS, and JavaScript. Added backend logic to monitor IP changes and update DNS records in real-time.

Courses

08/2024 – 08/2024	TypeScript <i>infosys springboard</i>
07/2024 – 07/2024	Web development <i>IBM Skill Build</i> Web Development Course IBM SkillsBuild Finished a comprehensive web development course on front-end and back-end technologies. Had hands-on practice with HTML, CSS, JavaScript, and frameworks for developing contemporary, responsive web applications. Learned best practices in web design, development, and deployment.
07/2024 – 07/2024	Introduction to Internet of Things <i>NPTEL</i>
06/2024 – 06/2024	Agile-Scrum Development <i>infosys springboard</i>
